

Wordpress Install in under 5 minutes by discoveryvip

Download Wordpress

Go to <https://wordpress.org/download/> download and unzip. FTP or copy your files to your server root directory.

Prepare your Server

Option 1 – Localhost

- a. Download <https://www.apachefriends.org/index.html>
- b. Go to <http://localhost/phpmyadmin/> add database
- c. Go to root file <http://localhost/>

Option 2 – Server

- a. Access cpanel
- b. Setup database accounts and database
- c. Go to domain root.

Update php Install

Open and update file wp-config.php to have your server database settings.

```
/** The name of the database for WordPress */
```

```
define('DB_NAME', 'wordpress');
```

```
/** MySQL database username */
```

```
define('DB_USER', 'root');
```

```
/** MySQL database password */
```

```
define('DB_PASSWORD', '');
```

```
/** MySQL hostname */
```

```
define('DB_HOST', 'localhost');
```

Access Install

Go to your server root in the browser.

<http://localhost/>

Add your password, admin name, email...

That's it under 5 minutes 😊
